BINGO

I wrote this article because the voices that speak to me love saying BINGO! which can be understood more in this other article [LINK](#)

Knowing that reptilians don't use jargon this had to have some deeper meaning so here is the theory below. It seems crazy to put so much thought into something as stupid as BINGO but they've had 6,125 years to think out strange things and love hiding secrets in plain sight like Illuminati people are instructed to do. Keep reading and I'll demonstrate it means you've been crucified by Biblical Serpents and their kind.

The history of the game dates back to the mid-1500s. "*Lo Giuoco del Lotto D'Italia*," meaning the "Lotto game of Italy". Even though lotto and the Italian Lottery, was all the rage. Players had cards with numbered squares on them, and the winning numbers were drawn out of a sack. The game made its way to France in the late 1770s, and it was a young Frenchman who developed an alternate version. He printed numbers on cards, three horizontal rows and nine vertical, with the numbers one through 90 in random arrangements. Again, numbers were drawn from a sack, and the first person to cover a horizontal row was the winner.

Beano

Each horizontal row had five numbered and four blank squares in a random arrangement. The vertical rows contained numbers from 1 to 10 in the first row, 11 to 20 in the second row, etc, up to 90. No two Lotto cards were alike. Players used beans instead of modern ink daubers to cover numbers.

3x9 with 90 numbers.

With 3 horizontal rows containing 5 numbers and 4 blank spaces this accounts for the 15 missing squares in modern Bingo.

Modern Bingo has 15 less numbers for a total of 75.

The most chips one can place on a Bingo board without having a Bingo is 19, not counting the free space leaving 6 spaces.

5x5 card with 25 squares with 1 free space in the middle. With a free space only 24 are used in the game.

Modern Bingo was Invented in 1929

B: 1-15 (3x5)
I: 16-30 (3x5)
N: 31-45 (3x5)
G: 46-60 (3x5)

O: 61-75 (3x5)

B:1-18 (2x3x3)

E:19-36 (2x3x3)

A:37-54 (2x3x3)

N:55-72 (2x3x3)

O:73-90 (2x3x3)

The original version having 15 more numbers matches the numbering convention of each square but 15 are missing with the original game having 3 additional numbers in each slot.

The game made its way to France in the late 1770s

BINGO was his name O song:

"**Bingo**", also known as "**Bingo Was His Name-O**", "**There Was a Farmer Had a Dog**", or informally "**B-I-N-G-O**", is a English language children's song of obscure origin. Additional verses are sung by omitting the first letter sung in the previous verse and clapping instead of actually saying the word.

The earliest reference to any form of the song is from the title of a piece of sheet music published in 1780. As noted above the French version of the game Beano was created in the late 1770s which is essentially the same time period. The reptilians whom are Biblical Serpents used Bingo in the song but the game was still Beano until the early 1900s. In 1929, toy maker Edwin S. Lowe was said to have played a round of Beano in New York and created BINGO. Since this man created the game it's possible he was one of the reptilians kind since it's their inside secret.

There was a farmer who had a dog,
and Bingo was his name-o.
B-I-N-G-O
B-I-N-G-O
B-I-N-G-O
And Bingo was his name-o.

There was a farmer who had a dog,
and Bingo was his name-o.
(clap)-I-N-G-O
(clap)-I-N-G-O
(clap)-I-N-G-O
And Bingo was his name-o.

There was a farmer who had a dog,
and Bingo was his name-o.
(clap)-(clap)-N-G-O
(clap)-(clap)-N-G-O
(clap)-(clap)-N-G-O
And Bingo was his name-o.

There was a farmer who had a dog,
and Bingo was his name-o.
(clap)-(clap)-(clap)-G-O
(clap)-(clap)-(clap)-G-O
(clap)-(clap)-(clap)-G-O
And Bingo was his name-o.

There was a farmer who had a dog,
and Bingo was his name-o.
(clap)-(clap)-(clap)-(clap)-O
(clap)-(clap)-(clap)-(clap)-O
(clap)-(clap)-(clap)-(clap)-O
And Bingo was his name-o.

There was a farmer who had a dog,
and Bingo was his name-o.
(clap)-(clap)-(clap)-(clap)-(clap)
(clap)-(clap)-(clap)-(clap)-(clap)
(clap)-(clap)-(clap)-(clap)-(clap)
And Bingo was his name-o.

Uh oh Spaghetti-O's emphasizes the O as well with kids in commercials making the OK sign over their eyes which appears to be odd as they eat "O" shaped pasta. Simply look it up on YouTube with this [LINK](#)

The pope makes this OK sign like the kids in those commercials [LINK](#) as do Hollywood people and musicians [LINK](#).

The OK sign over your right eye signifies to crucify people on your right, the left, people on your left. If they do it over both eyes it's intended to mean crucify everyone in front of you. If they have fingers on their palm such as three or four that means crucify three or four people to their right or left depending on which eye they have the OK hand sign over. If they are also sticking out their tongue that implies to do it quickly. These people are obsessed with crucifying others since the Serpent were crucified by God further into this article.

In the Italian language: An *i* on the end of a word indicates that it's plural, while an *o* or an *a* indicates that it's singular. Latin is Italian thus the O on Bingo is singular. It's probably a Latin acronym.

To summarize Eve and Adam were fooled so there is something about Biblical Serpents being crucified by God for fooling them with a lie. Were they crucified by God on the 15th of some month? Perhaps Nisan 14 is when God gave the Jews a Passover to escape the Devils Egypt and the Devil was crucified on the 15th hence 15 has this meaning. Were Adam and Eve fooled on the 14th and God crucified the Serpent on the 15th the next day thus Nisan 14 wasn't random date picked out but had deeper meaning? Putting the blood of the lamb on the door saved their firstborn. Is this because Adam and Eve were the firstborn fooled by a lie? Serpents thus would hate the number 15 likely because of this? After 15 claps the song Bingo ends.

Could Eve from the Book of Genesis been deceived in 4103-4102 BC on April Fools Day, thus this is why Nisan 14 is important? Nisan 14 (the Jewish Passover) isn't always April 1st on this day in the Gregorian vs Hebrew system. It could have been this very day in the BC era as years alternate differently from the Gregorian/Hebrew systems.

Coming up on 4-1-2026 is April Fools day and the Hebrew date for the Jewish Passover aligns with Nisan 14 on that April Fools day.

So were Adam and Eve crucified on April 2nd (when it aligns with Nisan 15 of 4102/4103 BC era Gregorian) along with Biblical Serpents possibly would require some 343 more years to the know Hebrew calendar. This would make the Hebrew year at around 6125 rather than 5782 (2022 AD)

Babylon is situated exactly where the Garden of Eden was according to the Tigris and Euphrates rivers. Nimrod built the Tower of Babel most likely where they lied to Adam and Eve possibly on April Fools day in 4103/4102 BC era. This was most likely an Obelisk structure and not an elaborate structure as shown in Google based off the squared area in Babylon (Iraq Area which has square foundation) Do all obelisk constructed symbolize a lie was told there around the world? It's a very strange object.

Some historians speculate that April Fools' Day dates back to 1582, when France switched from the Julian calendar to the Gregorian calendar, as called for by the Council of Trent in 1563. In the Julian Calendar, as in the Hindu calendar, the new year began with the spring equinox around April 1.

April 1 became the butt of jokes and hoaxes and were called "April fools." These pranks included having paper fish placed on their backs and being referred to as "poisson d'avril" (April fish), said to symbolize a young, easily caught fish and a gullible person.

Matthew 4:19 And he saith unto them, Follow me, and I will make you fishers of men.

In 1957, the BBC reported that Swiss farmers were experiencing a record spaghetti crop and showed footage of people harvesting noodles from trees. Uh oh Spaghetti-O's? Is this because once they were expelled from Eden they had to work hard for cheap food rather than eat from various nice fruit trees?

Farmer:

Late Middle English: from Old French *fermier*, from medieval Latin *firmarius*, *firmator*, from *firma* (see farm). farmer (sense 1) originally denoted a bailiff or steward who farmed land on the owner's behalf, or a tenant farmer. We could summarize this as a slave.

DOG:

Odd to sing about a dog in such a simple song, but perhaps intending God in reverse as some form of insult.

The most popular theory is that "dog" is derived from another Old Germanic word – "docga" (dogga). This word was used to refer to a powerful breed of canine, and it is believed that its root is the word "dukkōn", meaning "power, strength".

Odd the song also focuses on the O which are numbers 61 to 75 in the game. It's also a countdown of 5 claps in the song reaching 15 claps at the end. "O" is also the 15th letter in the English alphabet.

What this possibly means:

There was a farmer who had a dog,
and Bingo was his name-o.

This could then mean "There was a slave who had a power and Bingo was his name O and at the end of 15 claps Bingo is no more because they were crucified like Serpents in the Bible were on Nisan 15.
